1. Objective and Outcome

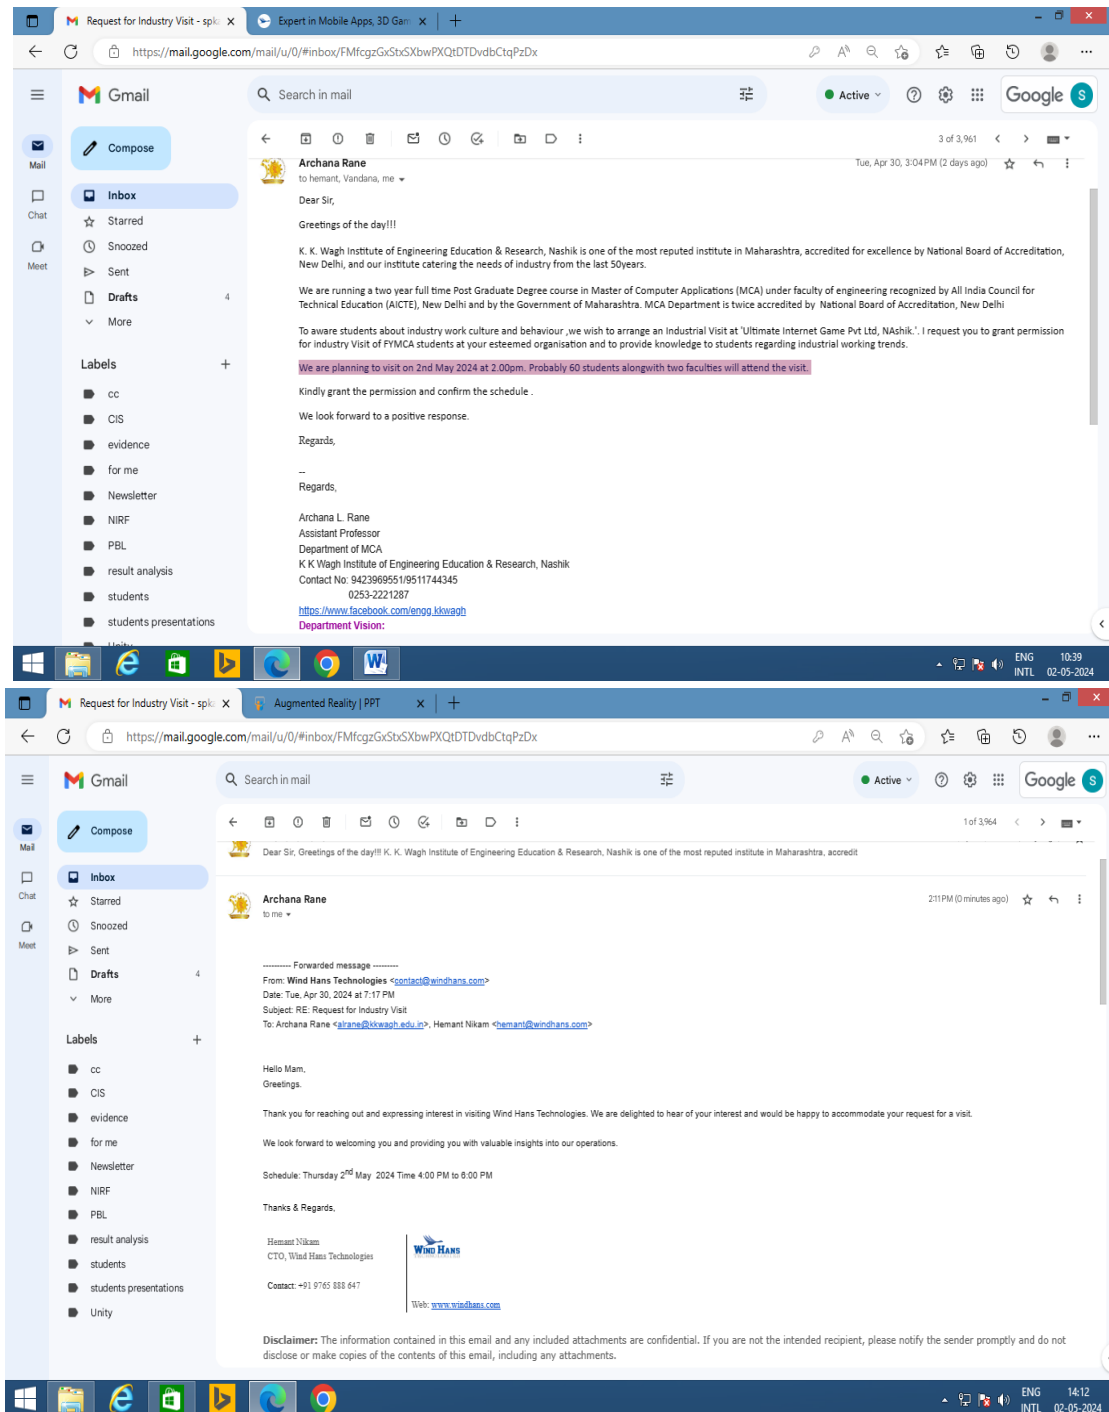

1.1. Objective:

- To gain practical insights into the application of software development methodologies and practices in an industrial setting.
- To understand the real-world challenges and opportunities in software development, project management, and team collaboration.
- To observe the latest trends and technologies used in the gaming industry and their implementation in software development life cycle.
- To interact with industry professionals and learn about their roles, responsibilities, and career opportunities in the field of software development.
- To explore how theoretical knowledge gained in MCA program is applied in real-world projects and to bridge the gap between academia and industry.

1.2. Outcome:

- Enhanced understanding of practical application of software development methodologies and technologies, leading to improved academic performance and better preparedness for professional roles in the field.
- Increased awareness of industry practices, trends, and career opportunities, facilitating informed career decision-making and professional growth.
- Strengthened networking and collaboration opportunities with industry professionals, potentially leading to internships, job placements, or collaborative projects.
